

WEBEZ™ AND SUPPLY CHAIN MANAGEMENT

Almac's integrated, comprehensive supply chain management tools support a full range of studies, from small, simple protocols to large, complex ones.

WebEZ™ is a configurable randomisation system built for clinical trials that would typically use manual or paper-based randomisation processes.

Including WebEZ as part of your supply chain management strategy provides a simple yet powerful automated randomisation and drug ordering solution for your smaller scale projects.

SYSTEM FUNCTIONALITY:	KEY BENEFITS:	HELPS SPONSORS TO:
<ul style="list-style-type: none"> • Web-based system • Configurable platform built by Almac's Project Leaders • Screening, randomisation, resupply, and discontinuation • Real time reports and visibility of supplies • Automates randomisation, drug ordering, and generation of shipments 	<ul style="list-style-type: none"> • Time and resources saved vs. using manual or paper alternatives • Minimal start-up time: days not weeks • Built and managed by same project staff overseeing your packaging and distribution • Broad range of configuration points • Priced competitively 	<ul style="list-style-type: none"> • Utilise a simple, yet powerful solution for smaller scale projects • Automate randomisation for Investigator Initiated Trials (IITs) and Expanded Access Programs (EAPs) • Meet aggressive timelines • Reduce costs • Replace manual procedures • Control ancillary items

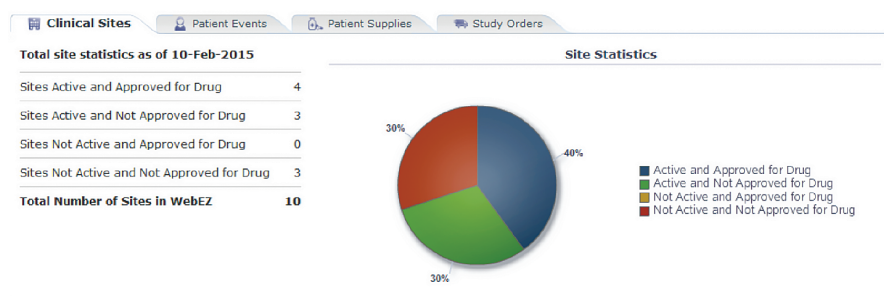

WHAT'S NEW IN WEBEZ 2.0?

- A new user interface, including a new homepage layout
- Smart navigation and re-designed page formats
- Increased browser compatibility
- Optimised for mobile devices
- Provides flexible reporting modules that allow the user to filter by their specific needs
- Provides a simplified resupply and site management capability
