

Almac Sample Management Service

Almac Sample Management Service

Almac Diagnostic Services provide global biopharma clients a high quality, end-to-end clinical trial Sample Management Service which includes Specimen Collection & Logistics and Specialty Central Lab Services.

Why choose Almac?

From Sample-In to Data-Out, Almac provides a tailored, premium 'white glove' service with a range of integrated solutions to help solve your sample management challenges & make your life easier. Our dedicated project management teams will provide end to end oversight to ensure your needs are met on time and within budget.

"Your Samples Your Timelines."

Benefits

The benefits of Almac's combined sample management service:

- **Eliminates need to contract with multiple vendors**
- **Reduces costs** - highly effective solution
- **Reduces risks** to precious samples
- **Minimises delays** in clinical trial timelines
- **Maximises success** for your clinical trial

Clinical Trial Specimen Collection & Logistics Service

Almac Diagnostic Services offer an end-to-end clinical trial specimen collection & logistics service for your clinical trials including clinical trial site training and management.

We offer a range of bespoke specimen collection kit manufacturing options and clinical trial material bulk kit supply. Almac's dedicated logistics team has extensive distribution and supply chain knowledge to help plan your global distribution strategies.

Benefits of partnering with Almac:

Utilising Almac integrated kits & logistics capabilities can aid with better site and patient outcomes, reduced turnaround time, more specimens passing QC and a higher percentage of valid eligibility calls reported for clinical testing within a clinical trial, resulting in more patients enrolled to receive your drug.

With the quality, speed and flexibility you expect from Almac, alongside excellent communication, and a dedicated clinical trial dashboard we ensure that you keep in full control of your clinical studies at all times.

Almac can store your samples in a biorepository to aid biopharma client backup plans in case a drug development programme does not meet its primary endpoint. The specimens can be tested in future with different assays, either already validated or validated by Almac, for other future biomarker programme needs.

Services include:

- Strategy & Planning
- Regulatory Compliance
- Bespoke Kit Design & Manufacturing
 - (Single, Multiple & Timepoint Kits)
- CTM (Clinical Trial Materials) Bulk Kit Supply
- Labelling Service
- Supply Chain Risk Management
- Logistics including Importer of Record (IOR)
- Clinical Site Management
- Returns & Disposal
- Data Management (Clinical Trial Dashboard)

Specialty Central Lab Service

Almac Diagnostic Services offer a premium 'white glove' Specialty Central Lab service on a 'Project by Project' basis. We can take care of your end-to-end needs acting as your central lab vendor who can also seamlessly integrate with other labs.

We can conduct your specimen lab management & processing, storage, data needs and downstream analysis either in-house or work with other vendors to ship samples to them for analysis.

Our specialty lab solutions include a range of qPCR and NGS platforms with a range of proteomic and single cell options to aid with a 'multi-omics' approach.

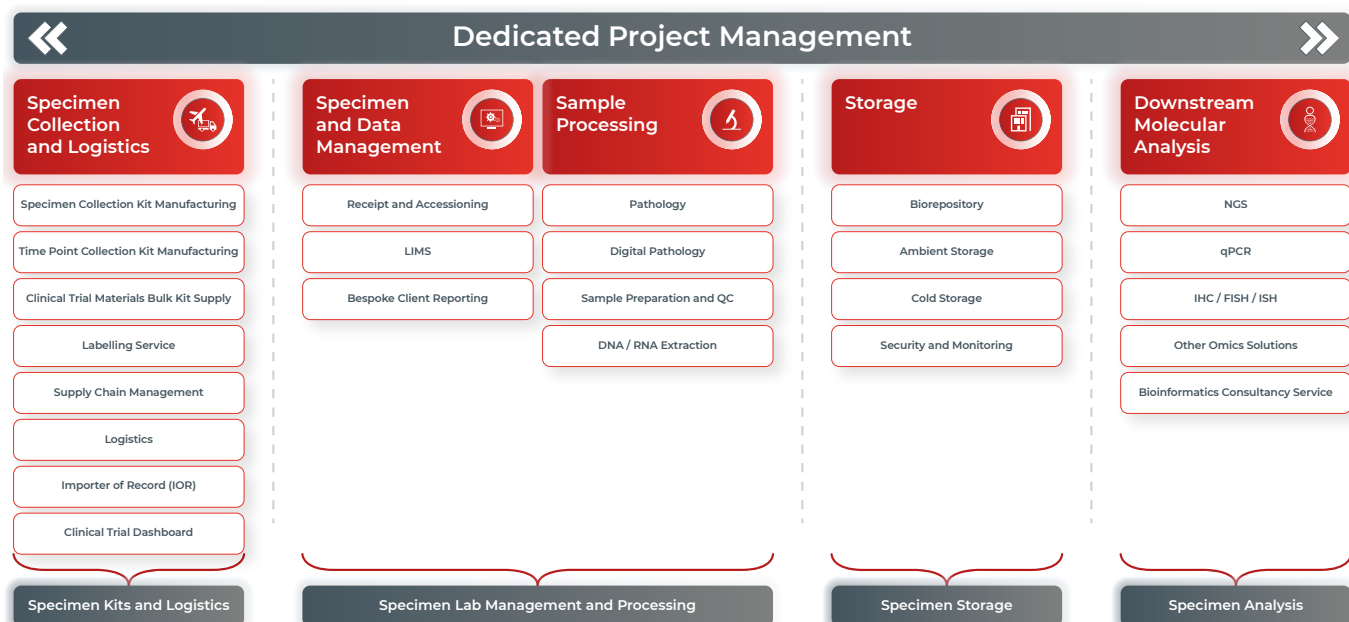

Benefits of partnering with Almac:

Utilising Almac as your specialty central lab service provider provides reassurance your clinical specimens are being stored safely and are readily accessible as required (no long lead times to retrieve or process specimens). Our premium service can be tailored to client's individual needs, providing complete flexibility for your biomarker programmes. Offering the service on a project-by-project basis ensures that you are not locked in to long term punitive contracts and charges in comparison to other service providers in the market.

Services include:

- Sample Logistics Management
- Sample Receipt & Accessioning
- LIMS
- Sample Data Management & Bespoke Reporting
- Sample Preparation & QC
- Pathology & Digital Pathology
- DNA & RNA Extraction
- Biorepository Storage (Cold, Ultra Low & Ambient)
- Downstream Molecular Analysis
- Bioinformatics Consultancy Service
