

ALMAC TRIAL COORDINATOR™

eCOA

Flexible, accurate, and participant-focused electronic assessment capture built for global trials.

Overview

High-quality outcome data is essential for trial success.

As a core component of Almac Trial Coordinator™, our next-generation integrated eClinical platform, the eCOA (electronic Clinical Outcome Assessment) solution delivers flexible, accurate, and participant-focused electronic assessment capture. Fully integrated within the Almac ecosystem, it simplifies data collection, enhances compliance, and reduces burden for participants and sites.

This unified approach provides sponsors with real-time, reliable data and premium services - empowering better decision-making at every stage of the study.

Key benefits

Multimodal support. Global scale. Participant-first design.

Flexible full-modality solution

- Supports validated scales via ePRO, ClinRO, ObsRO, and PerfO with modality-specific workflows.
- Enables site, participant, and caregiver input through secure mobile, tablet, or web apps-provisioned, BYOD or hybrid.

Participant-centric engagement

- Delivers multilingual, intuitive interfaces that reduce training and improve compliance for sites and participants.
- Supports automated alerts, reminders, in-app notifications, and real-time adherence insights.

Unified integration with eClinical systems

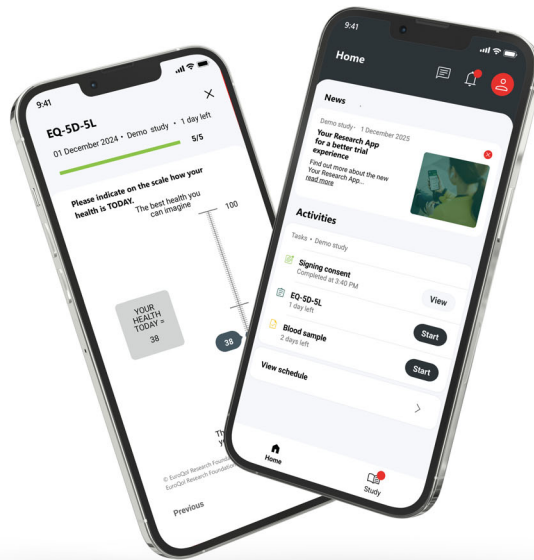

- Seamless integration with eClinical systems such as IRT (including Almac Trial Coordinator™ IXRS®3 IRT), EDC, CTMS, medical devices.
- Enables real-time eligibility checks, visit triggers, and randomisation logic. As well as extendable modules such as eConsent and clinical supply management.

Why Almac

Technology alone doesn't deliver outcomes - expert service ensures success at every step.

As a privately owned and independent company, Almac re-invests all profits back into the business, enabling continued innovation and expansion to meet the growing needs of global clients - working in long term partnerships to advance human health.

With over 30 years of experience, Almac delivers scalable, regulatory-ready eCOA technology -backed by full-service operational support and deep integration expertise across IRT, CTMS, eConsent, and clinical supply.

Proven global delivery

- Deployed across 100+ trials in 25+ countries and 250+ sites
- Enabled multi-language deployment with localised user validation
- Supported hybrid and decentralised trials in oncology, CNS, and rare disease studies

Compliance & security

- 21 CFR Part 11 validated with secure audit trails
- GDPR and HIPAA compliant
- ISO 27001 certified
- Almac Quality Management System backed by global audits
