

cGMP PEPTIDE MANUFACTURE

- Expertise in long, complex peptides, and peptide cocktails
- Solid phase and liquid phase synthesis
- Experience in conjugation to a wide range of chemical entities
- Facilities for containment of cytotoxic compounds
- Strong project management support
- *rapidd*[™] – Integrated package for accelerated preclinical development

cGMP MANUFACTURE OF PEPTIDE

SERVICES & TECHNOLOGY PLATFORM

DEVELOPMENT AND MANUFACTURING CAPABILITIES

- Experience-based process definition allows rapid development for early phase projects
- Small scale models of manufacturing equipment for process development
- Roadmap to develop processes under Technical Transfer
- Design of Experiments based robustness studies for late phase development programs
- Solid phase and liquid phase peptide synthesis capabilities
- Kg scale liquid phase capability ranging from 5L to 1000L

PURIFICATION AND LYOPHILIZATION

- Biotage, preparative HPLC, SEC, and ion exchange purification expertise
- Proprietary purification methodology for long peptides
- Class 10,000 final product processing area
- Containment for purification and isolation of Cat 3 compounds

CONJUGATED PEPTIDES

- Small molecules, highly active molecules, and cytotoxics
- Hormones, lipids, PEG, and other polymers

ANALYTICAL SUPPORT

- Access to a strong analytical group of 170 analysts

All our clients have unique needs.
That's why we develop unique solutions.
