

# Almac to Patient

## The Journey Home

Expertly managing clinical trial supplies, for people at home, in places all over the world.

Participants. Subjects. Patients. People. However we define them, the role they play in bringing new drugs to market is unquestionable.

At Almac we understand that reducing the burden of participation and creating more patient-centric clinical trials is a key priority for sponsors.

Our Direct to Patient Solution, Almac to Patient, has been developed with a patient-centric approach, enabling sponsors to include patient homes as part of their decentralised trial strategy.

## End-to-end control

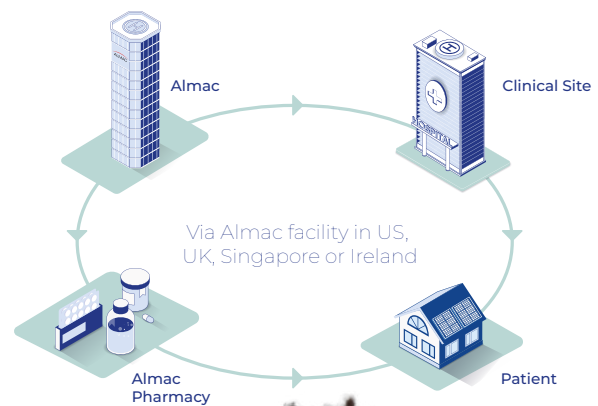

Achieve end-to-end control thanks to:

- A dedicated team of clinical supply experts to design the complete supply chain, including variations for each country and protocol.
- Supply chain management support on drug forecasting, inventory strategy, and IRT set-up.
- Cutting edge, GDPR and HIPAA compliant, software underpinned by a global quality framework.
- A solution designed with patients in mind, with patient privacy and security built in.
- Full visibility of the shipping process as part of the overall clinical trial.
- Pharmacist check completed on every shipment before dispatch.

By including distribution to patients' homes as part of your decentralised clinical trial strategy, our supply chain experts, global quality, and clinical supply infrastructure, ensures effective, convenient and personalised delivery of your IMP to the front doors of patients.

We achieve this via an Almac to Patient or Site to Patient solution, depending on country requirements and protocol need; providing a controlled, complete, and care-focused approach that keeps patients at the heart of the operation, every step of *the journey home*.

Almac have a team of highly qualified Pharmacists who provide clinical expertise on dispensing, preparation and administration of IMP. Our licenced Pharmacies ensure compliance and quality, providing peace of mind to sponsors and patients.

## The complete package

Receive the complete package from one, expert partner with:

- In-depth expertise across all phases and therapeutic areas, and the flexibility to meet protocol and country-specific needs.
- Robust, GDP courier management pathways providing dependable shipping of ambient and temperature-controlled IMP.
- Security of delivery to the patient home, ensuring IMP arrives on time and in the correct condition.
- Supporting pharmacy services; designing compliant labels, developing drug administration and patient dosing instructions, as well as training on appropriate handling of IMP in patient homes.
- Expertly coordinated returns management.

## A better patient experience

Provide a better patient experience by:

- Reducing the patient (and site) burden with simplified, accurate, and controlled process that makes participation easy.
- Including hard-to-reach, diverse patient populations in trials with our managed and dedicated service.
- Harnessing our knowledge, processes, and technology to control effective delivery to each patient's home.

The world is changing. Is your clinical supply chain keeping pace?
